REBECCA A. HUMPHRIES
DIRECTOR

SUBMITTED: May 12, 2008

MEMORANDUM TO THE NATURAL RESOURCES COMMISSION

Subject: Antlerless Deer License Quotas
Wildlife Conservation Order Amendment No. 12 of 2008
FOR INFORMATION ONLY

Authority:

The Natural Resources and Environmental Protection Act, 1994 PA 451, as amended, authorizes the Director and the Commission to issue orders to manage wild animals in this state.

Discussion and Background:

This amendment establishes the public land antlerless deer license quota and private land antlerless deer license quota for each deer management unit (DMU) in the state.

Following a poor 2005 deer season when 413,000 deer were taken, the harvest for both the 2006 (450,000) and 2007 (485,000) seasons indicate an increasing statewide deer herd. Results from the 2007 Michigan deer harvest survey indicate that fewer hunters and less hunting effort was required to achieve the increased harvest, another indication of an increasing deer herd. Additional information available to Wildlife Division staff support the potentially increasing deer herd. The one exception to this trend is southwestern Upper Peninsula. The winter of 2007-2008 has had a negative impact on the deer herd in that area.

The Michigan State Police provide an independent assessment of potential deer herd changes with the annual reported vehicle-deer accidents. In 2007, the number of vehicle-deer accidents statewide increased by 1.7 percent. While this is a relatively small increase, it is the second year in a row of increased reported vehicle-deer accidents.

The recommended antlerless deer license quotas would provide a statewide total of 66,875 public land antlerless deer licenses and 574,200 private land antlerless deer licenses. This is an increase from 2007, in which 56,900 public land and 547,300 private land antlerless deer licenses were available, and an increase of 7.5 percent from 2006. The projected statewide deer population for 2008 of 1,841,000 remains similar to the 2007 population, of 1,821,800. This is primarily the result of an increase in the Northern Lower Peninsula (NLP) projected population offsetting a decrease in the Upper Peninsula (UP) projected population.

Great Lakes, Great Times, Great Outdoors!

Upper Peninsula

In the UP, the recommendation is for 8,000 public land and 31,000 private land antlerless deer licenses to be available. In 2007, there were 10,200 public land and 35,500 private land antlerless deer licenses available. This decrease in antlerless licenses is the result of the winter of 2007-2008. The winter of 2007-2008 in the UP resulted in some winter deer mortality, and is expected to have a negative impact on fawn survival this spring. The projected deer population in the UP for 2008 is 323,600 deer, down from the 358,400 projected deer population for 2007. This decrease in the projected population resulted in the closing of two DMUs to private land licenses, one DMU to public land licenses, and a general decrease in antlerless licenses throughout the UP.

Nine DMUs in the UP will not have antlerless licenses available in 2008. However, archery hunters will be able to harvest an antlerless deer using a bow and arrow license or a combination license during the archery season. Five DMUs in the UP will have only private land antlerless licenses available and eight DMUs will have both private land and public land antlerless licenses available. The areas with antlerless licenses have agricultural crop damage, range damage to forest regeneration, and/or excessive vehicle-deer accidents. Antlerless deer hunting license availability in the UP has been designed to target the deer herd in specific DMUs. In DMUs with no antlerless licenses, the goal is to allow an increase in the population. In DMUs with only private land antlerless licenses, the goal is to permit an increase in the population on public land while maintaining or reducing deer on private land. In DMUs with both public and private land antlerless licenses, the goal is to maintain or reduce deer populations to better balance deer numbers with habitat.

Northern Lower Peninsula

In the NLP, the recommendation is for 23,000 public land and 136,400 private land antlerless deer licenses to be available. In 2007, there were 11,800 public land and 110,000 private land antlerless deer licenses available. This increase in recommended antlerless licenses reflects an increase in the projected deer population for 2008 of 31,800 deer, for a projected population of 613,300. This increase in the projected population resulted in opening two additional DMUs to private land licenses, four additional DMUs to public land licenses, and a general increase in antlerless licenses throughout the NLP.

Three of the 32 DMUs in the NLP will have no antlerless licenses available. However, archery hunters will be able to harvest an antlerless deer using a bow and arrow license or a combination license during the archery season. Twelve DMUs will not have public land antlerless licenses available. Many of the DMUs in the northwest are at goal; antlerless license availability in the northwest is designed to maintain the deer population. The remaining seventeen DMUs will offer both public land and private land antlerless deer licenses. Antlerless license availability in the northeast has been designed to maintain or reduce the deer population.

Southern Lower Peninsula (SLP)

In the SLP the recommendation is for 35,900 public land and 406,800 private land antlerless deer licenses to be available. In 2007, there were 34,900 public land and 401,800 private land antlerless deer licenses available. This recommended small increase in antlerless licenses reflects a small increase in the projected deer population for 2008 to 904,100 deer, up from 881,900 in 2007. Historically, in most of the SLP DMUs, private land antlerless license sales are less than the quota. This is the primary reason the recommended private land antlerless license quota did not increase by more than 5,000 from 2007.

The deer herd in the SLP has remained higher than desired in recent years. Liberal antlerless licenses have been available to help reduce the deer population. Vehicle-deer accidents and crop depredation concerns remain high in many counties in the SLP. The antlerless license quotas are designed to reduce the current deer population in the SLP.

Recommendation:

This order is being submitted for information and consideration. This item appeared on the Department's May 27, 2008 calendar and may be eligible for approval on July 10, 2008.

Douglas A. Reeves, Acting Chief
Wildlife Division

Director

WILDLIFE CONSERVATION ORDER

Amendment No. 12 of 2008

Under the authority of sections 40107 and 40113a, Act No. 451 of the Public Acts of 1994, as amended, being sections 324.40107 and 324.40113a of the Michigan Compiled Laws, the Natural Resources Commission and the Director of the Department of Natural Resources orders that, effective July 11, 2008 Commission meeting, the following sections of the Wildlife Conservation Order shall read as follows:

3.105 Antlerless-only license quotas.

Sec. 3.105. (1) The director, in consultation with and concurrence of the chair or vice chair of the natural resources commission, may make appropriate minor changes to antlerless deer quotas established in 3.105(2) to meet disease control, population goal, or other management objectives.

(2) Notwithstanding any other provision of this section, the antlerless deer license quotas are as follows:

DMU	DMU Name	Public licenses	Private licenses	Total Licenses
1	Alcona County	3,000	7,000	10,000
